

## Windows XP

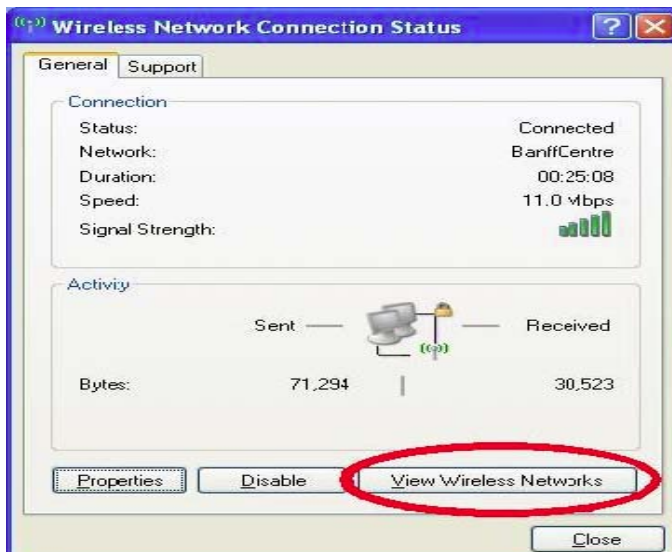

### Connecting to the Banff Centre Public Wireless Internet Connection

1. Click **Start, Settings, Network Connections**

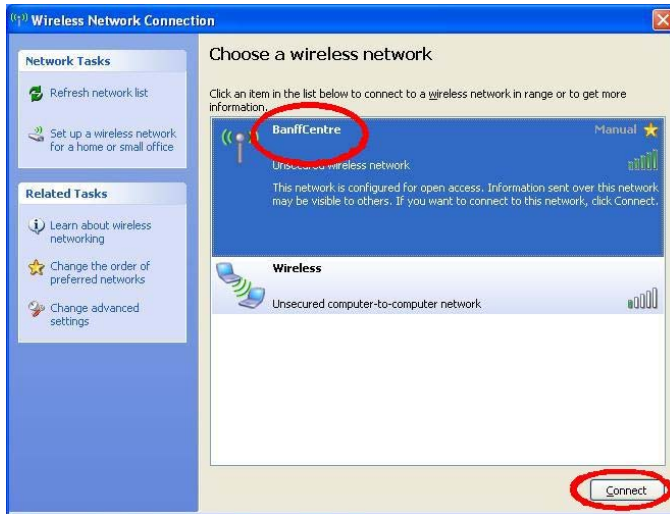

2. Double Click your **Wireless Network Connection**

3. Click on the **View Wireless Networks** button

A list of available network connections will be displayed

5. Click the **BanffCentre** wireless network connection
6. If it is not already connected, click on the **connect** button

7. A status window will pop up while connecting to the BanffCentre wireless connection.

8. Once properly connected, you will see that the status shows **connected** in the top right hand corner.
